POWER WITHOUT PAIN

A whopping 625,000 occupational injuries occurred in the manufacturing and construction industries in 2015. Ekso Bionics believes that is an unacceptable number and we are here to drastically change that statistic by developing products that keep workers safer, happier and more productive.

The Problem

How do we protect workers who sustain injuries due to keeping their arms raised and outstretched, often using tools, for long periods of time on the job?

Our Solution

The Ekso Works Vest is an upper body exoskeleton that elevates and supports a worker's arms to assist them with tasks ranging from chest height to overhead. It is lightweight and low profile making it comfortable to wear in all conditions while enabling freedom of motion.

Your Result

Workplaces experience fewer on-site injuries while tasks are completed faster and with higher quality results. Workers stay healthier and experience increased stamina. Companies gain greater productivity in factories and on construction sites.

Specifications

Weight
9.5 lb.

Adjustable Lift Assistance
5-15 lb. per arm

Adjustable Work Envelope
20" of adjustment

Worker Height Range
5'0" to 6'4"*

*Height range may vary due to torso length.
